

# Trench Drain Installations Shouldn't Be This Stressful

If you're among the many that have encountered frustration working with polymer concrete trench drain systems, then Josam's PRO-PLUS™ system is a perfect alternate solution. It offers a stronger and lighter product that's easy to install, won't shatter, and provides significant labor savings.

The strength of the PRO-PLUS™ trench drain system is unprecedented and its material is so strong that it's used in helicopter rotor blades, automotive bodywork, yachts, and aircrafts.

Made of glass-fiber reinforced polyester (GRP) pressed from sheet molding compound (SMC), a composite of polyester resin, mineral fillers, and glass-fiber mats.

## PRO-PLUS™ Trench Drain System

- **UNMATCHED** in Strength
  - Compressive Strength – 35% greater
  - Flexural Strength – 80% greater
  - Tensile Strength – 78% greater
- 1.5 times **STRONGER**
- 70% **LIGHTER**
- 1.7 times less thermal expansion
- **SHATTERPROOF**

Consider the best option for your next trench drain installation.
