

Heavy Duty Trench Drain in a Lightweight Package

Easy to Install Trench Drain

Pro-Plus Trench Drain System

Josam's innovative Pro-Plus trench drain system is made of SMC/GRP, a glass-reinforced polyester pressed from sheet molded compound. It's 1.5 times STRONGER than polymer concrete and 70% LIGHTER.

- Available with/without slope
- Variety of grating options
- 4", 8", & 12" nom. interior width
- Load class A-F

With its lightweight and optional features such as the innovative STARFIX grate securing system, the Pro-Plus trench drain system is simple to install, with labor saving benefits.

To learn more visit www.josam.com or contact your local Josam representative.

When considering the **Compressive, Tensile, and Flexural Strength**, the Pro-Plus Trench Drain substantially exceeds materials such as polymer concrete, polypropylene, and HDPE.

The unique properties of the Pro-Plus trench drain system **allow for considerably less thermal expansion than polypropylene or high-density polyethylene.**

FINALLY, a trench drain system with labor saving features

At No Extra Cost To You!
