

Stainless Steel Products

Cleanouts, Floor Drains, Pit Drains, P-Traps & Roof Drains

Josam Stainless Steel Floor Drains are ideally suited for environments where hygiene is a concern and/or corrosion problems exist. Ideal for applications such as slaughterhouses, dairies, breweries, food processing facilities, chemical plants, power generating stations, pharmaceutical plants and kitchen facilities. The extensive product range offers drainage products and options for all types of sensitive applications. Gratings are available to accommodate all types of load ratings from pedestrian to special-duty requirements. A variety of other options are available including perforated and solid filter baskets, membrane clamp devices, composition deck flanges and flushing rim connections. When it comes to specifying stainless steel, Josam offers the most extensive line of superior quality plumbing drainage products.
