

## EGLD-1000 Electronic grease level detector

Takes the guesswork out  
of effectively measuring  
Fats, Oil and Grease

IT'S A **NO BRAINER**  
WHEN YOU LEAVE  
THE THINKING TO US

### EGLD-1000 Features

- The EGLD-1000 can be mounted to most manufacturers' existing indoor and outdoor, manual grease or oil interceptors.
- Patented continuous level probe measures grease or oil within the interceptor.
- Microprocessor notifies facility personnel when the grease or oil interceptor requires manual cleaning/pumping.
- Optional modem feature can monitor the grease or oil level within an interceptor from a remote location via a standard telephone line.
- E-mail notification will alert facility users or code officials when their grease or oil interceptors require cleaning.
