

INSTRUCTIONS FOR USE

This catalog has been designed to simplify the selection of drainage products. Products are grouped by size, shape and function. Base products are shaded and include an application, specification, dimensional drawing and available options. An inverted triangle ▼ to the left of the option indicates that the product with that option is depicted with an application, specification and dimensional drawing. Base product options apply to optional products unless noted under "Options N/A." Photos of each product and its illustrated variations appear in a Pictorial Selection Guide in the introduction of each product section. All designs, descriptions and dimensions are subject to change without notice, and unless specifically stated otherwise, standard products in effect at the time the order is shipped will be supplied. All weights noted are approximate and are not guaranteed.

ROOF DRAINS
JOSAM

21500 SERIES
LARGE SUMP

APPLICATION

Used on roofs of any size, for any type of construction. Large slotted dome provides maximum free area for quick drainage of rainwater and protects the drain sump and connected piping from debris. WEILOC® compression flashing clamp holds the membrane or flashing securely to the drain body.

SPECIFICATION

JOSAM 21500 Series coated cast iron Roof Drain, large polypropylene locking dome, WEILOC® non-puncturing clamp ring with integral gravel stop, large sump with wide roof flange and bottom outlet.

21500-6 SERIES

LARGE SUMP with -6 Extra Wide Flange Drain Body

APPLICATION

Used on roofs of any size, typically concrete decking, large slotted dome ensures maximum free area for quick drainage of rainwater and protects the drain sump and connected piping from debris. WEILOC® compression-flashing clamp holds the membrane or flashing securely to the drain body. Extra wide flange provides positive support and large bonding surface for liquid applied membranes.

SPECIFICATION

JOSAM 21500-6 Series coated cast iron Roof Drain, large polypropylene locking dome, WEILOC® non-puncturing clamp ring, large sump with extra-wide roof flange and bottom outlet inside caulk connection.
