

Finally, a Revolutionary trench drain system with labor saving features  
**At No Extra Cost To You!**

# Heavy Duty Trench Drain in a Lightweight Package

Easy to Install Trench Drain

## PRO-PLUS™ Trench Drain System

Josam Company has revolutionized the drainage industry with the innovative PRO-PLUS™ trench drain system made of SMC/GRP, a glass-reinforced polyester pressed from sheet molded compound. It's 1.5 times STRONGER and 70% LIGHTER than polymer concrete. It's even SHATTERPROOF!

PRO-PLUS™ lightweight and optional features such as the innovative PRO-SNAP™ grate securing system, make this trench drain system easy to handle and install, with labor saving benefits.

- Available with/without slope
- Various grate options
- 4" & 8" nom. Interior width
- Load class A-F

When considering the Compressive, Tensile, and Flexural Strength, the PRO-PLUS™ Trench Drain substantially exceeds materials such as polymer concrete, polypropylene, and HDPE.

The unique properties of the PRO-PLUS™ trench drain system allow for considerably less thermal expansion than polypropylene or high-density polyethylene.
