

Josam's Trench Drain System **INSTALLATION IN A SNAP**

Josam's labor saving PRO-PLUS® system is an ideal solution when installing trench drains. The unique PRO-PLUS® material is manufactured using glass-fiber reinforced polyester (GRP) pressed from sheet molding compound (SMC), which is a composite of polyester resin, mineral fillers and glass-fiber mats. Its compressive, flexural, and tensile strength is unmatched. When compared to polymer concrete, PRO-PLUS® is 1.5 times stronger, 70% lighter in weight, and 1.7 times less thermal expansion.

Specify PRO-PLUS® with confidence, knowing contractors will find it easy to install and owners will be satisfied.

- PRO-SNAP® grates with no bolts
- Unmatched Strength
- Withstands Extreme Temperatures
- Less Thermal Expansion
- Lightweight
- Easy to Install
- Less Manpower
