

Josam's Trench Drain System **INSTALLATION IN A SNAP**

Josam's PRO-PLUS® system is an ideal solution when installing trench drains. The unique material is manufactured using glass-fiber reinforced polyester (GRP) pressed from sheet molding compound (SMC), which is a composite of polyester resin, mineral fillers and glass-fiber mats. Its compressive, flexural, and tensile strength is unmatched. When compared to polymer concrete, PRO-PLUS® is 1.5 times stronger, 70% lighter in weight, and 1.7 times less thermal expansion.

- PRO-SNAP® grates with no bolts
- Load Classes A-F
- Unmatched Strength
- Less Thermal Expansion
- Withstands Extreme Temperatures Preventing Shape Distortion
- Lightweight
- Easy to Install
- Less Manpower

Install the PRO-PLUS® system and experience the benefits of its labor-saving features.
