

# Feeling the stress with installing polymer concrete trench drains?

## Then consider the labor-saving **PRO-PLUS®** Trench Drain System.

PRO-PLUS® is a SMC/GRP drainage channel made from glass-fiber reinforced composite. It's an innovative material that is...

- ✓ Lightweight
- ✓ Extremely Strong
- ✓ Shatterproof
- ✓ Easy to install
- ✓ Requires less manpower

- Rebar supports molded into the channels
- Bottom outlets located at every ½ meter
- Nominal interior widths of 4" and 8"
- Lengths of 39.4" and 19.7"
- Various grate options for Load Class A-F

## When comparing **PRO-PLUS®** trench drains to polymer concrete its strength, weight, and thermal expansion is unmatched.

### PRO-PLUS® Strength

1.5 times Stronger  
35% greater Compressive Strength  
80% greater Flexural Strength  
78% greater Tensile Strength

### PRO-PLUS® Weight

70% Lighter

### PRO-PLUS® Thermal Expansion

1.7 times less

Install PRO-PLUS® and experience the benefits of its labor-saving features.
