

JOSAM™

OFTEN IMITATED

Josam's pylon foot with a wrap around retaining channel locks the foot to the carrier with only one bolt. Securing the feet to the floor is accomplished with also only one anchor bolt per foot.

Josam's Standard packaging includes preassembled components, storage of hardware and easy to read labels. Special job tagging labels are also available upon request.

The thread-on water tight flange on Josam's 55000 series cleanout provides a waterproof seal and stabilization during the concrete pour.

NEVER DUPLICATED

Josam Company's plumbing drainage products are the industry's benchmark for design, quality and functionality.

Over the years other manufacturers have attempted to duplicate Josam's products but Josam's distinguished features and benefits continue to go unrivaled. Josam's reputation to develop innovative quality plumbing drainage products continues to be the main reason why so many prominent architects and engineers choose to specify Josam products.

For more information on Josam Company products either contact your local Josam representative or Josam directly at 215.339.5370. You can also access or request a catalog, list prices and submittal drawings at www.Josam.com.
