

Trench Drain Installations Shouldn't Be This Stressful

Pro-Plus Trench Drain System

If you're among the many that have encountered frustration working with polymer concrete trench drain systems, then Josam's Pro-Plus system is a perfect alternate solution. It offers a stronger and lighter product that's easy to install, won't shatter, and provides significant labor savings.

Pro-Plus is made using glass-fiber reinforced polyester (GRP) pressed from sheet molding compound (SMC), a composite of polyester resin, mineral fillers, and glass-fiber mats. The strength of this product is unprecedented, its material is so strong that it's used in helicopter rotor blades, automotive bodywork, yachts, and aircrafts.

**Compared to
polymer concrete,
The Pro-Plus
Trench Drain is:**

- 1.5 times **STRONGER**
- 70% **LIGHTER**
- 1.7 times less thermal expansion
- **SHATTERPROOF**
- **UNMATCHED** in Strength
 - Compressive Strength – 35% greater
 - Flexural Strength – 80% greater
 - Tensile Strength – 78% greater

JOSAM

Consider the best option for your next trench drain installation.
