INTRODUCING

Lite Line Trench Drain System

Neutral Shallow Channel

Josam Company recently introduced the shallow Lite Line Trench Drain System. This lightweight neutral channel made of HDPE is strong, durable, and offers drainage solutions for low water flow areas and standing surface water. Optional features include a stainless steel or galvanized steel edge and four grates in load classes A and C.

Lite Line Trench Drains are ideal for applications such as parking garages, pedestrian areas, swimming pools, parking lots, driveways or where minimal slab depth is a concern.

**A low cost solution designed to meet
the demands of your drainage
applications!**
