

30000 SERIES	BODY ASSEMBLY																				
<p style="text-align: center;"><b>APPLICATION</b></p> <p>For use with all adjustable strainers. Wide flange anchors drain body in concrete and works in conjunction with the clamp collar to redirect waste through the collar's weepholes if seepage occurs around the strainer. The WEJLOC® clamp provides a non-puncturing positive bond of the waterproofing membrane to the drain body for applications where floors with standing water are to be sealed off from areas below. The collar is also invertible for extra vertical strainer adjustment to meet finished floor level.</p>	<p>THIS DRAIN BODY CAN BE USED WITH ALL STRAINERS AND ACCESSORIES IN THE STRAINER SECTION.</p>																				
<p style="text-align: center;"><b>SPECIFICATION</b></p> <p>JOSAM 30000 Series coated cast iron Floor Drain, two-piece body with double drainage flange and 1/2" primer tap with plug, bottom outlet, WEJLOC® invertible non-puncturing flashing collar with weepholes, threaded to receive a JOSAM adjustable strainer.</p>
