EDWARD J. McLAUGHLIN  
Commissioner

August 7, 2003

Board of Building Standards Case No. 0616-03  
**Product Approval - Josam Company Grease Recovery Device**  
Occupancy: N/A  
Type of Construction: N/A

## **RESPONSIBLE PARTY**

Chas Tevis  
Director of Engineering  
Josam Company  
2501 S. Front Street  
Philadelphia, PA 19148

Dear Mr. Tevis:

On July 24, 2003, you appeared before the **Board of Building Standards**, to request material/product approval for your company's grease recovery devices and grease monitors

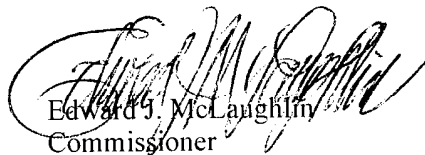

## **BOARD RECOMMENDATION – Grant Approval**

The Board recommends approval of this product based on the information that was presented and the favorable recommendation by the Plumbing Advisory Board. The various models of the *Josam GI-2000* device that the Board recommends to be placed on the City of Philadelphia's approved product list are:

1. Grease Recovery Device (GRD's) – 60300 A Series – Automatic Grease Recovery Device
2. Grease Monitor – ELDG-1000 – Grease monitor that can be installed in new or existing grease interceptors. This can be used to notify when the grease interceptor requires cleaning.

I have approved the Board's recommendation.

Very truly yours,

  
Edward J. McLaughlin  
Commissioner
